Summary

Final-year Information Technology student (CGPA: 9.49/10, Honors in Data Science) with experience building full-stack applications, AI-integrated systems, and scalable backend APIs using React, Node.js, FastAPI, and modern web technologies. National hackathon winner passionate about software engineering, backend development, and problem solving.

Skills

Languages: C, C++, Java, Python, JavaScript, TypeScript
Frontend: React.js, HTML5, CSS3, Tailwind CSS
Backend: Node.js, Express.js, FastAPI, REST APIs, Socket.io, WebSockets
Databases: MongoDB, MySQL, PostgreSQL
AI/ML: Machine Learning, LLM Integration, Semantic Search, Claude API, Agentic AI
Cloud & DevOps: Supabase, Edge Functions, Vercel, Docker, Git, GitHub, CI/CD Pipelines
Tools: Postman, TanStack React Query, Ollama, VS Code
Design: Figma, Canva
Practices: System Design, Data Structures & Algorithms, Agile/Scrum, Unit Testing, Code Review, REST API Design, Version Control, MS Office Suite (Word, Excel, PowerPoint), Tableau

Projects

SplitsVilla – Group Travel & Expense Management Platform 2026 GitHub
– Built a full-stack platform supporting trip planning, property booking and expense management for groups of 20+ members.
– Implemented real-time collaboration using Socket.io, invite codes, trip history and member management.
– Developed map-based property search using Leaflet.js and integrated Claude API for AI-powered budget estimation.
– Designed multi-currency expense settlement and a WebSocket-powered collaborative voting system.

Patient-Centric Healthcare Platform – Best Solution Award Jan 2026 GitHub
– Developed a FastAPI backend for symptom assessment and urgency triage across multiple severity levels.
– Built a recommendation engine that routes patients to appropriate healthcare pathways.
– Awarded **Best Solution** at the AISSMS National Hackathon among 50+ participating teams.

Real-Time Voice Agent 2025 GitHub
– Built an end-to-end conversational voice agent integrating Speech-to-Text, LLM reasoning and Text-to-Speech.
– Designed an asynchronous architecture for low-latency real-time conversations.

Achievements

– National Hackathon Winner – **Best Solution Award**, AISSMS Hackathon (2026)
– Startup Pitch Finalist – 3 ideas pitched, Udyamotsav (10,000+ participants)
– Adobe India Hackathon 2025 – Round 2 Qualifier
– Semi-finalist – Tata Imagination Challenge 2025
– Runner-up – BITBLAZE, Bharati Vidyapeeth Pune
– Finalist – National Level AI Summit
– Finalist – National Tech Exhibition, Bangalore

Leadership & Experience

Secretary – App Club Jun 2025 – Present
– Led a 50-member developer club and organized a 4-day flagship technical event with 300+ registrations.

Co-Head – Google Developer Groups on Campus 2025 – 2026
– Co-led a developer community of 100+ students while organizing technical workshops and study jams.

Co-Head – Mpulse National Level Tech Fest 2025 – 2026
– Coordinated operations for a national technical festival with 500+ participants and 30+ events.

Certifications

– Web Development – Apna College
– Programming in C++ – Spoken Tutorial, IIT Bombay
– Programming in Java – NPTEL
– Data Structures & Algorithms – NPTEL

Education

PES Modern College of Engineering, Pune Expected May 2027
Bachelor of Engineering in Information Technology
Honors in Data Science CGPA: **9.49/10**
Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Machine Learning
